Professional Summary

Frontend-focused Full Stack Developer with 5+ years of experience building high-performance, scalable web applications using React.js, Next.js, and modern JavaScript (ES6+). Specialized in developing responsive UI architectures, optimizing frontend performance, and integrating secure REST APIs. Proven experience in building data-intensive dashboards, improving user experience, and mentoring teams in scalable frontend practices.

TECHNICAL SKILLS

Frontend Technologies – React.js, Next.js, Redux Toolkit, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI

Backend & APIs – Node.js, Express.js, RESTful APIs, Middleware, Authentication (JWT, OAuth), MVC Architecture, API Integration

Databases – MongoDB, MySQL, MSSQL, SQL Server, Redis

DevOps & Cloud – AWS (EC2, S3), CI/CD, GitHub Actions, Docker (Basic)

Tools & Utilities – Git, GitHub, GitLab, Postman, Jira, Figma

Testing – Jest, React Testing Library, Mocha,

Deployment & Hosting – Nginx, PM2, Apache

Platforms & Environments – Windows, MacOS, Linux (basic admin), Webpack, Babel, Agile/Scrum

EXPERIENCE

Software Engineer, Finvasia

Dec 2023 – Present

Roles and Responsibilities:

Mohali, India

- Developed high-performance, scalable trading dashboards using React.js and Next.js, handling real-time data and improving UI responsiveness by 30%.
- Built reusable and modular frontend components, improving maintainability and reducing development effort across multiple modules.
- Led frontend architecture decisions and contributed to code reviews, ensuring best practices in performance, scalability, and clean code.
- Integrated advanced security protocols in collaboration with backend and DevOps teams, reducing system vulnerabilities by 30% and ensuring compliance with industry regulations.
- Partnered with QA and design teams to deliver polished, bug-free releases under tight deadlines, ensuring consistency in branding and functionality.
- Played a key role in bridging technical and business operations by conducting live demos for sales and back-office teams, ensuring product features aligned with real-world workflows and user expectations.
- Participated in daily agile ceremonies and stakeholder discussions, translating business requirements into scalable technical solutions that meet client expectations.
- Conducted code reviews and mentored junior developers, fostering best practices in component architecture, testing, and performance optimization across the team.

Software Engineer, Jupitice Justice Technologies Pvt. Ltd.

Oct 2020 – Dec 2023

Roles and Responsibilities:

Chandigarh, India

- Led a team of 5 developers, managing task distribution, code quality, and delivery timelines while ensuring high-performance frontend and backend development.
- Implemented state management using Redux, improving application performance and ensuring efficient handling of complex UI states.
- Integrated Redux for effective state management and implemented third-party React libraries to enhance UI components and user experience.
- Developed RESTful APIs using Node.js and Express.js, enabling seamless integration with frontend applications and ensuring secure data handling.
- Translated UI/UX designs into functional interfaces, ensuring cross-browser and cross-device compatibility across major platforms.
- Collaborated across the SDLC, including requirements gathering, development, code reviews, and integration testing, ensuring smooth deployments.
- Contributed to UI architecture decisions and improved component reusability across multiple modules.
- Utilized JIRA to manage sprint tasks, track bugs, and improve workflow visibility, reducing turnaround time and boosting team efficiency.

Trainee Android Developer, Click Labs Pvt. Ltd.

Jan 2020 – Jul 2020

Roles and Responsibilities:

Chandigarh, India

- Developed Android UI components and integrated Google Maps APIs for location-based features.
- Implemented core functionalities including UI handling and email integration.

PROJECTS

Real-Time Market Analytics Dashboard

- Built a real-time analytics dashboard using React, Next.js, and WebSockets for live data streaming.
- Optimized UI rendering and performance for handling large datasets in trading applications.
- Improved responsiveness and user experience for high-frequency data scenarios.

Third-Party API Integration

- Integrated third-party APIs (KYC, payments) into core workflows, handling authentication, data mapping, and robust error handling.

Customer Onboarding Optimization

- Optimized user onboarding flow by integrating digital KYC and API workflows, reducing user setup time by 30%.

AI-Powered Case Analysis Module

- Developed an AI-powered case analysis module to generate insights such as winning probabilities and recommendations.
- Integrated AI models with React frontend and Node.js backend for scalable data processing.

Technologies: React, Next.js, Redux, Node.js, REST APIs, WebSockets

EDUCATION

Master of Science in Information Technology, G.G.D.S.D College

Aug 2018 – Dec 2020

Chandigarh

Bachelor of Science in Information Technology, G.G.D.S.D College

Aug 2015 – Jul 2018

Chandigarh
